

# Improvement Modes

- System & process definition
- Performance definition
- Performance measurement
- Improvement target setting

## ***Cardinal Improvement Concepts:***

The system cannot.....

1. Maintain its designed performance, without the required thru-life system care;
2. Eradicate under-performance, unless corrective actions are taken;
3. Overcome medium-term performance challenges, unless preventive actions are taken;
4. Address altered-demand performance challenges, without adaptive actions being taken;
5. Exceed its designed performance, unless it is enhanced (upgraded).
